Charles Pickering and Gene Green of the FCC, I have just been informed by e-mail that your respective parties are attacking XM Satellite Radio for providing its PAYING users with weather and traffic updates. why? is the question in the heads of many thousands of users I would imagine. There is no justifiable reason to stop these broadcasts that I can think of. It is helpful to many people and I don't think it takes away from any other source of this information either. I don't have time in the morning to watch the weather channel, so listening to XM on the way to work helps me out greatly. I would appreciate your reconsideration of the manner at hand. Thank you.

-Sean Lucas
